

RETURN CRITERIA FOR THE REGENERATION INSERT

INJECTORS

1. The goods returned for regeneration must be supplied in the packaging of the new product that have replaced the part to be regenerated in the vehicle.
2. The injector returned for regeneration corresponds to the product purchased in its place.
3. The returned goods must be a genuine OE product - please note the manufacturer's logo stamped on. The copies of cores with no marks will not be accepted.
4. The returned injector must be complete, not disassembled and contain all components present in a newly purchased product.
5. The product must not be mechanically damaged.
6. The product returned for regeneration must not be excessively corroded (no pitting).
