

New to the Aftermarket: Pre-Tensioned Suspension Springs

10 Year Warranty – Only from Ruville

Replacing suspension springs using conventional spring compressors can sometimes cause damage to the surface coating of the spring. This results in corrosion damage that can lead to early failure or breaking of the spring. This is why Ruville will offer the pre-tensioned suspension springs in OE quality beginning in January 2015 – which makes it possible to mount them without using a spring compressor.

The benefits for your garage include:

- **10 year warranty with unlimited mileage (in accordance with current warranty)**
- Safe and (most importantly) damage-free mounting
- Simple to mount, saves time and improves efficiency
- Makes work easier for your mechanics

You can find all the information you need about this at www.ruville.com/de/pre-tension
